WNTC To Poll Student Views

Radio station WNTC's primary purpose on the two campuses which it serves is to provide for the listening tastes and pleasures of the students of Clarkson and State. The present programming has not been met with the acceptance anticipated. In an effort to provide the programming wanted for the coming year, every student in the dorms at State and Tech will soon be asked to conscientiously fill out a questionnaire. It will cover all phases of programming plus the request for a short statement of each person's ideas for the improvement of programming and quality.

WNTC has many plans for the near future. As possibilities: a morning "Get up for Class" show (6:30-9), 24 hour programming and more extensive training of personnel for the improvement of quality. These plans and others can be carried out successfully only with the full support of both student bodies. The programming poll will give the students a say in what they want to hear next year, so be sure to participate!! WNTC's aim: big station sound to rival that of schools much larger than hours.

For latest news coverage be sure to tune in "Radio World Wide" Monday-Friday from 6-6:30, and for your classical listening pleasure, "Sunday with the Masters" every Sunday afternoon.
